

# Panasonic Lumix G H- FS1442AEK 14-42mm F/3.5-5.6 ASPH Lens

Based on the Micro Four Thirds standard, the Panasonic Lumix G Vario 14-42mm/F3.5-5.6 II ASPH./MEGA O.I.S. Lens provides a versatile zoom range of 14-42mm (35mm equivalent: 28-84mm) ideal for capturing varying situations ranging from landscape to portrait, delivers a high optical performance through its two aspherical lenses while its Mega Optical Image Stabiliser (O.I.S.) ensures consistent steady framing. And since it is so lightweight and compact, the Lumix G Vario naturally makes a great addition for any photographer. Key Features Exceptional: its Mega O.I.S. suppresses the blur caused by handshake in order to facilitate steady framing where what you see in the Live View Finder or LCD image is what you'll receive in the shot, enabling you to easily capture super clear shots - even in low lighting. Advanced: its embedded High-speed Contrast AF System and Inner Focus System are each enhanced during both still and video recording. Range: its minimum focus distance of 0.2m (14-20mm)/0.3m (21-42mm) even at full zoom, its maximum photographic magnification of 0.17x (35mm camera equivalent: 0.34x) and its 7 aperture blades combined ensure an overall appealing smoothness in out-of-focus areas. Consistent: achieve high quality images with outstanding clarity each time thanks to the Lumix G Vario's steadfast multi-coating process which

delivers wholly improved results when shooting against a light source.

## Features

### All Product Details

<b>Brand</b>	Panasonic
<b>Product Type</b>	Lenses
<b>Model</b>	H-FS1442AEK

### Dimensions

<b>Product Weight</b>	0.11kg
-----------------------	--------

### Warranty

<b>Manufacturers</b>	12 Months
