

Panasonic Micro SD Card - 32GB

Reliable, ultra-fast and ready for 4K video. The Panasonic 32GB Micro SD Card with UHS Speed Class 3 for 4K video supports faster speeds (reads up to 95 MB/s and writes up to 90 MB/s). UHS-I ultra-high-speed, high durability and toughness for professional performance and reliability. Key Features Ultra High Speed: The high read speed lets you transfer large-sized data quickly and easily. UHS-I is an SD card bus standard with a maximum data transfer speed of 104 MB/s. The high speed writing lets you take burst shots without dropped frames, or RAW photos with a digital SLR smoothly. Ideal for Action Cameras: UHS Speed Class 3 (U3) is a new speed class standard that delivers smooth video recording to meet the demands of advanced applications like 4K and high-bit-rate Full HD. Smart Guard Data Protection: Panasonic's "Power Failure Guard" automatically retrieves the affected part to preserve important data, even in the event that the data is damaged by sudden power interruption.
