

# Panasonic SDUD Series SD Card - 64GB

Ready to support the best resolution yet, the Panasonic SDUD Series SD Card boasts an Ultra High Speed (UHS) of Class 3 which enables advanced 4K video support and overall fast read and write speeds. This SD Card contains a spacious 64GB storage capacity, and through its outstanding durability and consistency, it proves a professional performance. Key Features Enhanced: this SD Card boasts the new standard of UHS Speed Class 3 (U3) which enables smooth video recording, and superiorly meets the demands of advanced applications like 4K and high bit-rate Full HD where it attains a constant minimum write speed of 30MB/s and optimises the video experience. Ultra-fast: its UHS-I Fast Transfer Speed embodies read speeds of up to 95MB/s and write speeds of up to 90MB/s proving a performance so exceptionally high that you can even transfer large-sized data both easily and quickly. Durable: designed to be both tough and safe complete with accident proof (PROOF7) against harsh conditions like Water, Temperature, Shock and Static Electricity. And in the event of the unexpected, Panasonic's Smart Guard Data Protection otherwise known as "Power Failure Guard" ensures the automatic retrieval of the affected part in order to preserve your important data. Expedient: features a long-lasting MLC Flash Memory with an exceptional upper limitation on the number of re-writing cycles that is 10x longer than other TLC types, and also ensures a lower error rate so that you can save even more precious memories just as you remembered them.

## Features

### All Product Details

<b>Brand</b>	Panasonic
<b>Product Type</b>	SD Cards
<b>Model</b>	RP-SDUD64GAK

### Warranty

<b>Manufacturers</b>	12 Months
----------------------	-----------
