

# Belkin CAT6 Snagless Patch Cable - 5m

How does a Cat 6 patch cable affect your network? It's like when you replace one blocked pipe in your plumbing line and suddenly the flow increases, the transfer is more fluid and the whole system is improved. The RJ45 High Performance Category 6 UTP Patch Cable is the perfect performance upgrade. Used to replace any Cat 5 cable that fails to support 100 Base-T or Gigabit Ethernet. With RJ45 male-to-male connectors and a snagless molded strain relief. Key Features

**Easily Connect:** Enjoy clean and clear transmissions with this patch cable, letting you connect a laptop or desktop computer to a wall outlet, modem, router, another networking device. Perfect in conjunction with 100 Base-T and Gigabit Ethernet networks.

**Clear Signal:** 50 micron gold plated connectors ensure a clean and clear transmission, accurate plug positioning and consistently high performance.

**Stranded Wires:** Stranded copper wires are more pliable, making them better suited for travel. The wires are also housed in a durable PCV outer jacket for abrasion and corrosion resistance. While the snagless moulds protect the RJ45 tap from being damaged during installation.

**Speed:** This cable meets the the CAT6 Ethernet network cable standard and can support Ethernet speeds of up to gigabit per second, exceeding the performance requirement of Category 6.

## Features

All Product Details

**Brand** Belkin

**Product Type** Network Cables
