

# Innergie PowerGear USB-C 45 Watt Laptop Power Adapter

The Innergie PowerGear USB-C 45 Watt Laptop Power Adapter is a slim yet safe power adapter. It's as easy and simple power solution for using as a replacement or secondary power adapter at home and in your office. With this power adapter you can count on compatibility, with major USB Type C devices - no need to worry. Key Features Design: The Innergie PowerGear USB-C 45 Watt Laptop Power Adapter is not only small in size, but it offers design touches—such as cable-wrapping features and a cable that's connected flat against the adapter body. Power protection: Innergie products are safer than ever. With Innergie's InnerShield Protection Technology, all of your devices are protected from over-current, over-power, over-voltage, over-temperature and short-circuiting, giving you stable power and peace of mind. Length: A 1.5-meter cable provides plenty of length for the type of locations where you're likely to want to plug in a laptop. That includes stand-up desks and other places where a power socket may not be within easy reach. Reversible plug: The PowerGear USB-C 45 Watt's reversible plug can be inserted in either orientation, so there's no more squinting to check whether the plug is right side up.
