

Laser 4K 3D Ready HDMI Cable - 2m

Catering to Ultra HD (UHD) 4K content and 3D TV, this HDMI cable is compliant with the HDMI standard 2.0 and all previous versions (V1.4, v1.3, v1.2). Naturally, it also works with all older HDMI devices as well. Features such as Audio Return Channel (ARC), Dolby ATMOS and High Speed Ethernet are all supported, making this cable ideal for high end home theatre receivers or just connecting your Blu Ray, STB, DVD player or gaming console. Made from high quality OFC copper and shielded with multiple layers of insulation ensures an interference free signal transmission. The outer flexible nylon braiding makes the cable easy to use in tight spaces (like behind flat panel TV's or in AV cabinets) and gold plated connectors with moulded plugs ensure a secure fit in any HDMI device. Key Features HDMI High Speed with ethernet compliant Version 2.0 specification compliance 3D support HDMI ethernet channel Audio Return Channel 4K x 2k support More colour spaces 24k Gold plated 19 pin HDMI connectors Oxygen Free Copper cable Triple shielded with Aluminum and copper foil with mylar coating PVC jacket with high visibility nylon braiding
