

Razer Nomma Gaming Speakers

The Razer Nomma Gaming Speakers is the powerful audio that can completely immerse you in your experience, bringing games, movies and music to life. With optimised drivers built for full range sound and extreme clarity, the Razer Nommo takes you to a new dimension that blurs the line between fiction and reality.

Key Features

Sound: Razer custom woven glass fiber 3-inch drivers are engineered to deliver ultra-clear sound with uncanny sharpness. By incorporating custom glass fiber into the speaker cones, it affects the vibrations and produces a tighter sound with higher frequencies, allowing you to hear distinct layers and audio details.

Rear-Facing Bass Ports: Hidden behind the speaker bodies are rear-facing bass ports, each engineered to deliver increased bass output for a fuller, richer range of audio. The bass ports sit inside massive chambers, amplifying the low end to shake your core whether it's a gunshot, right hook or EDM track.

Design: Each Nommo Satellite is long and cylindrical which helps with air flow being channelled to its rear facing bass ports for improved bass response and reduced distortion at higher volumes.

Convenient: Razer Nommo features a 3.5mm jack to fit all PC setups.
