

Google Wi-Fi - Triple Pack

Home life, uninterrupted. Google Wifi is a new kind of home Wi-Fi system that can improve your Wi-Fi experience by seamlessly connecting with your modem or gateway. Key Features Wi-Fi by Google: Streaming a movie or joining an important video call? Prioritise that device for the fastest speeds available when it matters most. And, Google's Network Assist software does the hard work for you to eliminate slowdowns so you and your family can keep doing the things you love without missing a beat. Keeps itself fast with Network Assist: Advanced Google software works in the background to manage your network so you never have to. Network Assist always selects the clearest channel and fastest band for your devices, plus offers helpful insights so you always get the most out of your Wi-Fi. Simple Wi-Fi control: Use Google's Wifi companion app to see what's connected, run a speedtest, quickly troubleshoot, set up a guest network, and more. Family-friendly tools: Manage kids' screen time by pausing Wi-Fi to their device during bedtime, dinnertime, or whenever appropriate. A scalable system: Google Wifi is modular - simply add more Wifi points to extend coverage to the garage, patio, attic, or anywhere else. If you have a smaller home, start with a single point and add on if you need more coverage.

Features

[All Product Details](#)

Brand Google

Product Type Mesh Networking

Processor

Processor Model Quad-core ARM CPU, each core up to 710 MHz

Memory

Ram 512MB

Storage Capacity

Capacity 4
Storage Type eMMC

Connections

Connections 2 Gigabit Ethernet ports per Wifi point

Wireless Ready Simultaneous dual-band Wifi (2.4GHz / 5GHz) supporting IEEE 802.11a/b/g/n/ac

Software and System Requirements

Operating System Android 4.0+ or iOS 8+

Dimensions

Product Width 10.6cm

Product Height 6.87cm

Product Weight 340g

Warranty

Manufacturers 24 Months
