

Blue Yeti Nano USB Microphone - Grey

Specially created for podcasting, content production, streaming, audio calls, and voiceover work, this premium Blue Yeti Nano USB Microphone lets you produce studio-quality recordings. This nifty device highlights fantastic 24-bit sound quality with a latency-free headphone output and commands for volume. It is also built with a premium finish, so it can blend well with any computer setup. Key Features Create your own mini audio recording studio! Blue Yeti Nano takes your creative outputs to studio-quality lengths. It is crafted with two Blue-proprietary 14mm condenser capsules specially tuned to provide outstanding clarity and detail. Yeti Nano supports high-quality 24-bit/48kHz recording, making it perfect for streaming and recording. It is also enhanced with the powerful Blue VO!CE vocal effects* which is perfect for podcasting, streaming, calls, content production, or music recording. With its flexible dual pickup-pattern modes, you can easily set the one that's best for your project. Cardioid mode is excellent for single-host recordings, while the omnidirectional mode is best utilised when you have various participants in the same room. Thanks to the Blue Yeti Nano's incorporated metal desktop stand, you can now seamlessly ease your way through the recording process and modify the angle of your mic anytime you want. Enjoy easy setups! With the Blue Yeti Nano USB Microphone's plug and play feature, you can just connect it to your Mac or PC device and you're good to go. *Requires download and installation of Logitech's free G HUB software. **Not all colours featured are available.
