

Mitsubishi Electric Deluxe LN60 High Wall Heat Pump / Air Conditioner - Black

For the correct sizing of heat pumps and an installation quote please contact your local Harvey Norman store. The LN60 Deluxe High Wall sets a new standard in unparalleled design and customised home comfort; with advanced features such as 3D i-See Sensor technology, patented Dual Barrier Coating, Plasma Quad Plus Filtration and Dual Split Vane Technology. Boasting improved energy efficiency with R32 refrigerant and a sleek, premium finish, the LN Deluxe Series truly redefines the heat pump. 3D i-See Sensor

The unique 3D i-See Sensor continuously analyses the temperature profile of your room, detecting exactly where you and your family are located based on your unique body heat signatures. With this thermal data, it then directs the perfect amount of heating or cooling towards those who need it most. Dual Barrier Coating

The patented and world's first Dual Barrier Coating from Mitsubishi Electric prevents dust and dirt from accumulating on the inner surface of the indoor unit; keeping your heat pump clean year-round. Keeping key internal components like the heat exchanger, fan and internal duct clean is important for both home comfort and efficiency. Not only does dust and dirt build-up typically create unpleasant odours, it also forces a heat pump to work harder, which can result in significantly

impaired energy efficiency. Dual Barrier Coating prevents dust and oil build-up on the interior of the heat pump for the ultimate in peace of mind, ease and comfort. Plasma Quad Plus Filtration The new Plasma Quad Plus Filter effectively removes six types of air pollutants including bacteria, allergens, viruses mould, dust and micro particles with up to 99.7% efficiency; for a cleaner, healthier living space. Dual Split Vane Technology With the ability to create various airflow patterns, both horizontal and vertical, every person in a room can be comfortable. R32 Refrigerant R32 is a refrigerant with just one-third the global warming potential of R410A and has zero ozone depletion potential. R32 offers increased energy efficiency, and is said to be the next generation of refrigerants Premium Coloured Finish The Black Diamond LN Series comes in a range of stunning colour options including White Diamond, Red Diamond and Black Diamond, in a premium gloss finish. The matching wireless controller adds a cohesive, stylish touch to your interior design. Built-in Wi-Fi For the ultimate in aesthetics and heat pump control no matter where you are, the Black Diamond LN Series comes equipped with a Wi-Fi Interface inside a hidden pocket in the indoor unit.

Features

All Product Details

Brand	Mitsubishi
Product Type	Heat Pump/Air Conditioner
Model	MSZ-LN60VGB
Colour	Black Diamond

Heat Pump/Air Conditioner Features

Heating Capacity	6.8kW
Cooling Capacity	6.1kW

Energy

Energy Star	Cooling 2.5 - Heating 3
--------------------	-------------------------

Dimensions

Height	307mm
Width	890mm
Depth	233mm
Product Weight	15.5Kg

Warranty

Manufacturers 60 Months
