

Mitsubishi Electric RapidHeat KJ60 Floor Console Heat Pump / Air Conditioner

For the correct sizing of heat pumps and an installation quote please contact your local Harvey Norman store. The RapidHeat KJ60 heat pump incorporates industry leading RapidHeat technology to provide you with superior performance. With a new slim design the RapidHeat KJ60 sits discreetly at floor level. Meanwhile three uniquely shaped vanes control airflow to provide you with optimum air distribution that is customizable to your preference. Rapid Heating Technology The Mitsubishi Electric RapidHeat Floor Console Series ensures the perfect room temperature is reached faster with new Rapid Heating Technology. Advanced Sensors coupled with Intuitive Control Logic mean optimal running temperatures are reached in the shortest amount of time possible with maximum energy efficiency. Automatically activated at start up in low temperature conditions and when two way air flow is selected, warm air is blown in a downward direction first before the air is returned back into the indoor unit where it is reheated a second time before it is released again. As a result a room can now heat up to twice as fast in comparison to our previous model meaning our floor consoles are more energy efficient than ever. Sleek, Sophisticated Design Mitsubishi Electric RapidHeat Floor Consoles features clean, sharp lines creating a

streamlined, modern floor mounted heating. The removable base allows the Rapid Heat Series to be recessed into your wall. This dramatically reduces the depth of the indoor unit from 215mm to 145mm - a decrease of 33%! The perfect solution for unobtrusive floor mounted heating or for new buildings and renovation projects. Multi Vane Flow - Even Heat Distribution The RapidHeat Series allows for complete customisation for ultimate comfort. The multi vane flow function blows warm air in both an upward and downward direction providing even and effective heating whilst also eliminating draughts. This is achieved via three uniquely shaped vanes that are designed for better airflow control and the freedom to customise them to your preference. High Energy Efficiency RapidHeat Floor Consoles (KJ25/35/50) have been awarded the Energy Star mark, signalling they meet strict energy efficiency standards, meaning Mitsubishi Electric has more Energy Star floor consoles than any other brand. They also feature Econo Cool which switches airflow to swing mode, ensuring you use less energy to provide an overall cooling effect during the summer months. Optional Wi-Fi Control Upgrade With the addition of award winning Mitsubishi Electric Wi-Fi Control, you can control and monitor your heat pump from absolutely anywhere via your smartphone, tablet or online account. 6.8 kW Heating Capacity & 6.0 kW Cooling Capacity

Features

All Product Details

Brand Mitsubishi
Product Type Floor Console Heat Pump
Model MFZ-KJ60

Heat Pump/Air Conditioner Features

Heating Capacity 6.8kW
Cooling Capacity 6kW
