## Ascent

## Blender -

## Copper

Combining sleek design with power and precision, Vitamix introduces the first high-performance blenders with wireless connectivity to deliver the ultimate convenience and versatility now and for years to come backed by a 10 year warranty. With a family of containers available you can create a customized personal blending system designed to fit your life from smaller blending of 225ml blending bowl, 600ml blending cup to a 2.0 litre blending container for larger blends. Manufactured in Cleveland, OHIO USA with Bluetooth connectivity and new SELF-DETECT technology, your blender is ready to connect and evolve, while interlock technology prevents the machine from operating if the lid or container is not secure. All Vitamix Ascent Series blending Containers are not only easy to use they are made of BPA-free Eastman Tritan™ copolyester and are self-cleaning and dishwasher safe. Vitamix High-Performance blenders are a universal tool replacing multiple kitchen appliances performing every day culinary techniques of Blend, Heat, Puree, Crushing Ice, Chopping, Grinding, Whipping, Whole Food Juicing, Mixing and Churning. The Vitamix High-Performance blenders are a must in every kitchen. Using a Vitamix High-Performance Blender the difference is in the blend every time creating faster, perfectly smooth nutritious smoothies, juices, hot soups, flours & dough, nut butter, frozen desserts, batters, dressings & sauces, non-dairy milk, and more. Key Features Performs 10+ culinary techniques 10 variable speeds and pulse function allow you to manually refine every texture with culinary precision, from the smoothest purees to coarse chops for chunky salsas or thick vegetable soups. Self-detect

technology recognises the container size and automatically adjusts the blending time. Interlock technology prevents the machine from operating if the lid is not secure. Digital timer removes the guesswork with recipes you process manually. 2.0 litre BPA-FREE Eastman Tritan™ copolyester blending container and insulated to maintain cold temperatures. Laser-cut, hardened stainless steel blades. Self-cleaning with the drop of dish soap, blend at the highest speed and your container will self-clean in 60 seconds. 10 year full warranty. Family of container sizes available offering smaller personal blending solutions. The range of containers will build a customised blending system designed to fit your needs.
