

Miele Blizzard CX1 Cat & Dog Vacuum Cleaner

The Miele Blizzard CX1 Bagless Vacuum Cleaner utilizes Vortex Technology, an advanced dust separation system that gives you a highly efficient vacuum cleaner that can capture the most stubborn dust particles. Ideal for homes with pets the TurboBrush, reliably removes hair and fluff from carpets for a deep clean. Vortex Technology The Vortex technology of the Miele Blizzard CX1 results in flow velocity speeds of over 100km/h, easily picking up coarse soiling and dust from your carpet. The CX1 has two separate containers; one to hold coarser objects and particles, while the other holds onto fine dust. Hygienic Disposal By using separate dust containers, the Blizzard CX1 minimises dust plumes that can escape when the container is emptied. A Gore CleanStream filter ensures the finest particles remain in their own compartment, allowing you to dispose of them separately and securely. ComfortClean The Comfort Clean system used by the Miele Blizzard CX1 is able to monitor the fine dust filter and spring into action to automatically clean then when needed. The system will switch off for 20 seconds to complete the cleaning process before immediately returning to peak functionality. Simple Controls The CX1 is operated from a multifunction rotary selector, allowing you to choose the best application and power level for the task at hand. Each option is represented by a simple to understand symbol for intuitive operation. Convenience The Miele Blizzard CX1's comfort telescopic tube can be easily adjusted to find the perfect height for you to use comfortably, and with an operating radius of 10m there's less cause to be constantly unplugging your vacuum before you've finished the job. Powerful

cleaning thanks to Vortex technology – 1,100 W
Maximum air hygiene with HEPA AirClean lifetime filter
Universally applicable – floorhead with metal soleplate
Reliably removes hair and lint with its turbo brush.
