

# Philips Hue Motion Sensor

You can automatically switch your lights on with the help of this Philips Hue Motion Sensor. Include this sensor to your Philips Hue system to control your lights automatically. It is battery-powered so that you can place it anywhere you want in your home and let it detect motion to trigger the lights to open. Key Features On and Off Automatically: With the Philips Hue app, you can select which setting will trigger the motion sensor to turn on and off the light automatically. Day and Night Setting: You can set different light settings for any time of the day. It can turn on a gentle light at night, sufficient to help you move in the dark, and a crisp white light at the day to help you see better. Integrated Daylight Sensor: It allows you to lower your power consumption by turning the lights only when needed during daytime. It also turns off light when not in use. You can change its light sensitivity with the app. Wireless: Simply place it anywhere in your home. Thanks to its wireless structure and battery-powered design, there's no wires or cables to worry about.

## Features
