

# Panasonic KX-TG6822 Twin Handset Cordless Phone

Cordless phone twin-pack that works in blackout and features customised call blocking and noise reduction technology. Home communications have never been more simple or reliable. The KX-TG6822 is incredibly easy to use and unique technology means that even when the power fails, this cordless phone won't. You'll also love customising your phone, so that you only receive the calls you really want to answer. Peace of mind when you need it most Cordless phones have become a popular household communication tool. Most people don't realise until it's too late that their cordless phone must have power to communicate with the handset. Not being able to make calls during a blackout isn't just inconvenient; it could be the difference between life and death during a real crisis. The KX-TG6822 incorporates a clever Power Failure Talk System; during a black-out you simply place the handset on the base to supply the power stored in your handset to the base unit, then you can make calls even when the power is out. This model also features enhanced anti-blackout features there is no interruption even if you are in mid-call when the power goes out. Advanced audio features for amazingly clear calls Unique to Panasonic, the new Noise Reduction feature allows the user to clearly and easily hear the person on the other end of the call, by reduce the background noise from the other party by up to 75%. To easily start the noise reduction function during a call, simply press the NR button located on the bottom button row of the handset. This remarkable phone also features a

customised sound mode, allowing you to adjust the pitch of phone voices; meaning users of all ages can talk comfortably and be easily heard. Smart features provide the ultimate convenience By utilising the Smart Key, Incoming Call Block and Night Mode, you can easily control calls so they don't intrude on your life, yet still be available for the really important people. Simply press once the flashing Smart Key to check missing calls, answer incoming calls with speakerphone on, listen to a voice message, or snooze the alarm. Alternatively, the Incoming Call Block and Night Mode functions allow you to customise your phone so that it only rings when certain people call or stays silent at pre-set time. This is fantastic for when you are sleeping and don't want to be disturbed, yet still need to receive calls from close friends or family. Advanced Digital Answering Machine with remote operation The new high-quality Digital Answering Machine is much more convenient, allowing remote operation while away from home. Easy-to-use bright screen The large 1.8" white backlit LCD is easy to read and combines with a simple menu for easy operation. All the extras you expect from Panasonic The KX-TG6822 features the unique One Touch Eco Mode to greatly reduce signal output and power consumption along a phone book with enough space to store 100 names and numbers.
