

# Panasonic KX-TG7652 Twin Handset Cordless Phone

This incredibly intelligent cordless phone will make you wonder how you ever did without the convenience of Bluetooth, link-to-mobile, talking caller I.D and the ability to customise who you receive calls from. The KX-TG7652 is designed to make your home communications simple and manageable. Link your mobile to your handset with Bluetooth Now when your mobile phone rings at home, you don't have to go searching through the house to answer it. The KX-TG7652 allows you to link up to two mobile phones so that you can make and receive mobile calls through your home phone. What's more, the link-to-mobile phonebook allows you transfer up to 600 contacts from your mobile phone and the Bluetooth feature even gives you the freedom of hands-free via headset connectivity. Enjoy a greater transmission range You'll never need to worry about the signal dropping around your home, thanks to the new DECT Repeater technology showcased with the KX-TG7652. The repeater station re-transmits the signal to extend the range, allowing you to take a call up to double the original distance. Even better, the repeater is separate to the handset charger, so you can simply place it in the area of your home where you wish to extend the signal. Customise your phone to only receive important calls By utilising the Incoming Call Block and Night Mode features, you can control calls so they don't intrude on your life, yet still be available for the really important people. This is fantastic for when you are sleeping and don't want to be disturbed, yet still need to receive calls from close

friends or family. Lower your power consumption with Intelligent Eco Mode This feature uses Panasonic's unique technology to automatically sense when you're using the handset close to the base unit and lower the power consumption. Not only does this extend the available talk-time and prolong battery life, it's good for the environment. Digital Answering Machine The KX-TG7652 features a high-quality digital answering machine and a phone book with enough space to store 3050 names and numbers.
