

# Uniden DECT 1735 Single Handset Cordless Phone

Designed and engineered in Japan, Uniden's DECT 1735 uses wireless friendly DECT technology and has an integrated digital answering machine with message counter so you won't miss those important phone calls. Key Features Blackout Power Failure Protection: When a power failure occurs, the charged handset temporarily supplies power to the base unit. You can then make and receive calls using the handset. Made for High Density Living Environments: These phones are ideally suited to high density living environments and have excellent array of features suitable for any home. They have great talking range, unique styling, 3 line back-lit display LCD display and are Wireless (WiFi) Network friendly. Handsfree Freedom: This phone has a duplex speakerphone allowing you to have handsfree conversations and ensure you can keep working while on the phone. Adaptable: Put your handset where ever you must. The handsets can be wall or desk mountable to fit in with your decor.
