

Sony WF1000XM3 Wireless Noise Cancelling In- Ear Headphones - Black

Discover the Sony WF1000XM3 Wireless Noise Cancelling In-Ear Headphones. Only music. Nothing else. Put the outside world on hold – this is all about you and your music. No noise, no wires, no distractions. Just exceptional sound, industry-leading noise cancellation, and hour upon hour of pure listening freedom. Key Features Industry-leading noise cancellation *1 : The noise-cancelling technology in the WF-1000XM3 is the most advanced ever in truly wireless headphones, with Sony HD Noise Cancelling Processor QN1e. So you can lose yourself completely in your music. Superior listening with a new Bluetooth chip: Rather than relying on sound from one ear to the other, the newly developed Bluetooth chip transmits sound to the left and right ears simultaneously for an exceptional listening experience. Optimised antenna design: The placement of the headphones' Bluetooth antenna has been optimised to ensure wider coverage. This helps keep the signal strong for uninterrupted streaming. Engineered for a secure, stable fit: The noise cancelling earbuds are ergonomically designed to make contact with three different points on your ear for a secure, comfortable fit. A high-friction rubber surface keeps the noise-cancelling earbuds snug and secures in your ear so they won't slip out unexpectedly. Talk at a

touch with Quick Attention: Placing your finger over the earbud turns the volume right down and lets in ambient sound. So you can instantly chat with someone without taking your headphones off. Quick charging when you need it: Sometimes you need music, fast. So if your headphones are running low on power, a 10-minute quick charge in the charging case gives you up to 90 minutes of playtime. *1. As of June 1st 2019. According to research by Sony Corporation, measured using JEITA-compliant guidelines in Truly Wireless style noise cancelling headphones market.
