

# Sony WF1000XM3 Wireless Noise Cancelling In- Ear Headphones - Silver

Listen to all your favourite music anywhere you are by boosting your listening experience with the help of Sony WF1000XM3 Wireless Noise Cancelling In-Ear Headphones. With its ergonomic and user-friendly design, it will provide you with comfort and enjoyment that can keep up with you all day without any cords to hold you back. Key Features Dual Noise Sensor Technology: You can get yourself immersed in whatever you're listening to thanks to its one feed-forward and one feed-back dual microphones. It is powered by HD Noise Cancelling Processor QN1e that cancels more noise but uses less power. High-Quality Sound: Equipped with a tiny but powerful 6 mm driver unit that contributes a range of frequencies to give you exceptional sound quality. Stable and Reliable Connection: The preloaded Bluetooth® chip and augmented antenna deliver sound to both sides at the same time while ensuring a stable connection for your premium listening. Ergonomic Tri-Hold Structure: Thanks to its secure and comfortable design that has a high-friction rubber surface, it stays in contact with your ear's three different points to make the earbuds stay still while giving you the utmost comfort you need. Perfect Fit: You can find your perfect fit and have the most of your listening experience with the included three sizes

of earbuds and four sizes of long hybrid silicone rubber earbuds. **Battery Life:** You can enjoy and keep the music going for up to 6 hours on a single full charge and get 3x more hours added thanks to the charging case. With the noise-cancelling turned off, you can get 8 hours of playback and get a total of 32 hours added thanks to the charging case. For a 10-minute quick charge, you can have 90 minutes of playback. **Quick Attention:** Personalise your tap commands for more convenience when controlling your earbuds. **Adaptive Sound Control:** It has a smart function that automatically adjusts sound settings to suit your environment and your activity. You can customise it on the Sony | **Headphones Connect app.** **Voice Assistant-Enabled:** It lets you connect to your voice assistants Alexa, Google Assistant, or Siri to have quick access to your smartphone with just one touch.
