

Navman MiVue 1000 Sensor XL Dash Cam

Record your footages in Full HD 1080p 60fps with Navman MiVue 1000 Sensor XL Dash Cam. This high-quality but straightforward dash cam will work brilliantly with all your travels. It records in greater detail, even in low light conditions. The Navman MiVue 1000 sensor XL captures and records all your encounters on the road and can help protect yourself from fraudulent claims and accident disputes. It is also enhanced with features like headlight alerts, safety camera alerts, and driver fatigue alert that you need for a safe and smooth drive. Key Features Easy Menu Navigation: Its 2.7-inch LCD screen and simple buttons allow you to operate it quickly and easily. Low Light Premium XL Sensor: Have higher quality video recordings with its 2/3-inch low light premium CMOS sensor. Smart and Low Power Parking Modes: It has built-in motion and shock detection technology so that even while your vehicle is parked, it collects evidence if your car is bumped or scraped. The SMARTBOX constantly provides power to your MiVue device so you can still be protected even in Parking Mode. Built-In Battery: With its supercapacitor battery, it can always provide you with reliable performance even in hot conditions and temperatures up to 70°. GPS Tagged Video: It monitors and records your location, direction, and speed when you travel. Full HD 1080p Resolution: You can record 1080p high-definition videos with clear details even in low light for better quality evidence. 3-Axis G-Sensor: When a collision occurs, the Navman MiVue 1000 will show where the direction of the impact came and give information on how it happened. EZYSHARE via Wi-Fi: Directly upload your footages to social media or email with EZYSHARE via the MiVue Pro app to save it for safekeeping. Wide-Angle Glass Lens: Along with its HD resolution, it has a viewing angle of 150° for stellar-detailed footages and

images. Plus, its glass-made lens allows more light to deliver brighter and more vivid images. Optimised Day/Night Recording: Its Wide Dynamic Range (WDR) support automatically enhances video quality on any challenging lighting conditions. Event Recording Mode: It can detect sudden changes in motion or an impact and will automatically trigger the camera to save a protected video of the accident that can be used for analysis. *SMARTBOX is separately sold.
