

Cygnett Armored Lightning to USB-A Cable 1m - Black

This Micro To USB-A cable enables you to charge your digital devices more efficiently. The Armored Cable is Cygnett's most robust product yet, infused with DuPont™ Kevlar® Aramid fibres to further ensure durability. The cable connectors which are made of stainless steel have a sophisticated aesthetic and offers exceptional scratch resistance. Key Features Fast charging: Supports 2.4A/12W charging speed. Replenish your Lightning devices' empty battery more quickly. Flexible: The double-braided exterior enables the cable to withstand scratches, fraying, and breakage while still retaining flexibility. Strong: Materials are perfectly blended to reinforce the cable, making it more durable than most cords. The ultra-durable TPE lining also ensures the cord's endurance. Resilient: The cord is made with laser welded connectors that can withstand up to 100N of force, and metallic internal caging that protects the cord's interior. Certified: Tested to withstand bending for over 20,000 cycles under 80kg weight. Device Protection: The cord has advanced grounding through drain wiring to safeguard your device. *Smartphone not included

Features
