

Sonos ONE

Smart Speaker

- Black

Boasting the same, brilliant, room-filling sound quality as the other Sonos speakers you know and love, the Sonos One steps things up a notch with future-ready voice control built in. So you can enjoy surprisingly rich music and audio now and eventually, control your wireless multi-room Sonos system with simple, intuitive voice controls. Proven Design The Sonos One has been built using the same blueprints of the Sonos PLAY:1. Featuring Class-D amps and custom drivers built specifically for the speakers unique acoustic design, resulting in rich, room-filling and balanced sound. 42 Streaming Services Sonos now features up to 42 music and streaming services including Apple Music, Spotify, Google Play Music, Soundcloud and more. Sonos also provide software updates over time when new services are added to ensure existing speakers are able to access all of the latest services. Multi-Room Listening Like its predecessors, the Sonos One can connect via your Wi-Fi network to other Sonos speakers and products throughout your home. Allowing you to expand and modify your home audio system as you see fit. With the Sonos PLAYBAR, you can even set up a wireless home theatre system. Customise Your Audio Setup Create a wide spread stereo image with two Sonos Ones as a stereo pair, add rich, deep bass with the Sonos SUB, pair with your PLAYBAR or PLAYBASE for an epic home theatre surround sound experience without the hassle of speaker cables.
