

Sonos SUB Wireless Subwoofer

Soul shaking sound in a heart pounding design, the SUB wireless subwoofer from Sonos fills any room with deep, clear HiFi sound. 2 force-cancelling speakers positioned face-to-face offer massive sound with zero cabinet buzz or rattle. And because it's part of the Sonos wireless audio range, you can easily enjoy true multi-room music with smartphone control when combined with other Sonos speakers. Sonos designed - Hardware and software custom-designed by Sonos to produce rich, powerful sound, HiFi sound that's crystal clear at any volume. Listen down deep - Fills an entire room with thick layers of deep, bottomless sound that let you hear and feel every chord, kick, splash and roll. You won't just hear the difference our wireless subwoofer makes - you'll feel it in your bones. All sound, zero vibration - Two force-cancelling speakers positioned face-to-face means all the sound and energy from the music comes through loud and clear, and none of it is lost in cabinet buzz or rattle. One buttons setup - No wiring. No programming. Press one button, follow the simple prompts on your Controller and the system automatically adjusts audio settings to perfectly balance your SUB and the paired Sonos component for a flawlessly optimized, whole-room listening experience. Wherever you want it - Because it's wireless and designed to perform perfectly, whether positioned horizontally or vertically, you can put the SUB anywhere you want in the room - even lying flat under a couch. Control all your music in every room - Free Sonos controller apps for Android, iPhone & iPad let you control your Sonos players, internet music and computer from the palm of your hand. And if you have multiple music players, you can control each room and its volume individually or together. Play the music on your computer in any room - Play music stored on up to

16 PCs, Macs or NAS (Network Attached Storage) devices on your home network, supporting the most popular audio formats, from iTunes to MP3. Computer-free music playback - Get instant access to millions of songs and thousands of radio stations without ripping, downloading or turning on a computer. Sonos connects directly to these services over the Internet and then streams the music to the rooms of your choice. Simple setup - No technical or wireless expertise required. Put a Sonos speaker in any room where you want music and connect it to your home WiFi network using the free Sonos Controller App. The Sonos System Setup software provides simple on-screen prompts on any SONOS CONTROL. With the touch of a few buttons, you'll be play music all over the house in minutes. Expandable wireless system - Expand your wireless music system room by room. Wirelessly add more Sonos speakers to your house and enjoy true multi-room music.
