

Monster 8 Way Platinum Surge Protection Power Board

Designed to protect your home and family, not just your electronics. Is Your Equipment and Your Home at Risk of Total Loss? Power surges can be very serious. You could lose your home entertainment system, or home office equipment. You could even lose your home. The cause? Very common events that can happen very easily and at any time. Protect your electronics from storms and surges with Monster Power. This 8 outlet surge protected power board features 861 Joules of power protection. You won't find better value than Monster Essentials! WHAT is a Power Surge? A power surge is a very brief spike in your power or TV cable line. It can be caused by thunderstorms, changes in the power load from appliances going on and off, problems with your local utility company and much more. WHY Worry about Power Surges? The investment you've made in your home entertainment system, not to mention your home, can be wiped out in an instant. At a minimum, surges can reduce the lifespan of your electronic equipment around your home. HOW Does Surge Protection Work? In a power surge, energy is absorbed by a component called an MOV (Metal Oxide Varistor). This component absorbs excess energy and releases that energy as heat. If the MOV is overloaded there can be sparks and fire. WHAT Makes it Fireproof? We encase our MOV's in a fiberglass sleeve that does not melt when there is a power surge. That's what makes it your best defense against fire. And that's why you need Monster Power Protection equipped with Monster Fireproof MOV Technology. Convenient

Features A heavy duty, 1.5 metre power cord is included, and a protection 'on' indicator tells you when the surge protector is doing its job. Perfect for your HDTV, gaming console, DVD/Blu-Ray player, PC, laptop, mobile phone or anything else with a plug, rest easy that Monster Power won't let power surges and spikes destroy your home or electronic equipment.
