

Monster AP100 Surge Cube

Introducing the new AP100 Single Outlet Surge Protector by Monster Power! Now with added features and more protection for your devices! Updated MOV Fireproof Technology better protects your electronics from harmful electronic bursts and overheating that could result in a fire hazard. With MOV Fireproof technology sparking and overheating isn't an issue. An added buzzer alarm, featuring Nomex padding, alerts you should the MOV Fireproof technology fail, before any damage or loss can occur. Featuring an audible component, the new alarm system informs you when your devices are at risk, serving as a secondary warning, useful in events where you are unable to see the LED display lights. "Earthed" and "Protection On" Diagnostic lights further inform you that your devices are properly protected and safe from surges.
