

# Panasonic 90cm Induction Cooktop

PLEASE NOTE THIS PRODUCT IS NOT AVAILABLE IN ALL STORES BUT CAN BE ORDERED A cutting-edge, polished black cooktop which showcases a sophisticated design and intelligent technology. This feature-packed, quality induction cooktop makes it easier for you to create the dishes you love. Add a smart, sleek Panasonic induction cooktop to your modern kitchen. Advantages of Cooking with Induction Heating An induction cooktop uses a magnetic field to generate heat in the cookware itself. The result is powerful, quick, and precise cooking that saves time and energy while delivering optimal results. Safe : The induction cooktop uses a magnetic field rather than flames or elements to create heat, so its surface remains cool to the touch, except for just underneath where the cookware sits. Easy to clean : The smooth, flat cooking surface of the cooktop surface area is easy to clean because it does not get too hot, and food does not burn onto its surface. Cool : Since the cooktop does not heat up, your kitchen stays cooler. Heating efficiency : Induction technology has a high heating efficiency and heats up cookware so fast that it can boil water and cook food faster than other types of cooking appliances. Full Digital Control : With the touch of a fingertip, you can easily control all functions, including heat level adjustment and temperature settings. Time Saving : Panasonic induction cooktops incorporate patented coil and boost function designed for efficient heating to quickly reach desired temperatures to save time. Panasonic Genius Sensor Evolved from Panasonic's heat technology, the Genius Sensor monitors the temperature of the bottom of the pan for

quicker measurement. Panasonic's reliable temperature control program adjusts and maintains heat to the temperature of your choice. Advanced FlexZone The newly improved FlexZone is capable of heating large pans and grill plates with up to 38 cm diameter by combining more than one cooking zone. In addition, multiple dishes can be cooked at the same time due to the 12 electromagnetic coils beneath the glass cooktop. User-Friendly Interface The classic, uncomplicated design of the touch-screen interface allows for maximum functionality with every detail taken into account. Not only is the touch-screen easy to use, it is also sleek, blending into the glass cooktop creating an ultra-modern feel.

## Features

### All Product Details

<b>Brand</b>	Panasonic
<b>Product Type</b>	Induction Cooktop
<b>Model</b>	KY-T937VFEPG

### Cooktop Features

<b>Max. Total Performance</b>	3.6Kw
<b>Safety Features</b>	Automatic Safety Switch Off Child Lock No Cookware Detection Pan Overheat Sensor Residual Heat Indicators
<b>No. Of Burners/Elements</b>	5
<b>Heat Settings</b>	18

### Power

<b>Max Power</b>	10800W
------------------	--------

**Dimensions**

<b>Height</b>	68mm
<b>Width</b>	906mm
<b>Depth</b>	526mm
<b>Product Weight</b>	22kg

**Warranty**

**Manufacturers** 24 Months
